

Baseline Report Overview - Where You Were

Your Baseline Report includes a visibility score that displays the average of your initial Local page and Directory scores. Your Local Page Score was determined by your average visibility and optimization in Google Business Profile, Yelp, and Bing Places. Your Directory Score was determined by dividing the number of directories in which you were found by the number checked. **Due to the reliance on third-party data and their connection status, periodically we may not find a listing that may be there.**

Local Pages

The Local Pages score is based on the level of optimization of your listing. We assess various factors that contribute to your overall optimization, including the consistency of your name, address, and telephone numbers, as well as reviews, photos, business description, and more!

📌 Voice Search Readiness

Voice-First Devices are the next big thing. Voice Search is a function that allows users to search the web through spoken voice commands rather than typing. Google Voice Search can be used on both desktop and mobile searches. We check against several parameters that influence voice search and the consistency of your name, address, and phone number in the databases that feed voice search applications.

📌 Data Aggregators

Data Aggregators are data amplifiers. They are important because they distribute business data to hundreds of partners, search platforms, navigation systems, and mobile apps reaching a broader audience than anyone can on their own.

📁 Directories

Your Local Page and Directory scores are based on the number of places in which your listings are present, divided by the number of local page and directories we've checked. Successful scores are most often obtained when all listings are claimed, active and contain consistent information such as business name, and phone number.
